DETAILED ACTION

Status of the Application

1. Claim 8 and 19-22 have been examined in this application. This is a non-final office action in response to the Request for Continued Examination (RCE) filed on July 9, 2007.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 8 and 19-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Step (j) of claim 8 does not appear to be enabled in the specification as the specification does not specify the step of generating an overall confidence parameter for the selected medical clinical conclusion as a ratio of a first product of the first impact parameter and the first confidence parameter to a second product of the second impact parameter and the second confidence parameter.

The Office recommends amending the claims so that the formula recited on page 18, line 27 of the specification is recited in the claims.

Also, it is not clear how the membership function, recited on page 18, line 4 relates to the overall confidence parameter. Finally, it appears that the "second product

Art Unit: 3626

of the second impact parameter and the second confidence parameter” is the area of the best-case conclusion analysis. The Office recommends amending Claim 8 to set forth that the second product is the product of the best-case conclusion analysis.

Response to Arguments

4. Applicant's arguments filed on July 9, 2007 with respect to the pending claims have been considered but are moot in view of the new ground of rejection.

Allowable Subject Matter

5. Claims 8 and 19-22 would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art and specifically the Lee, Friedman and LaPointe references do not teach or suggest generating an overall confidence parameter for a clinical conclusion wherein the overall confidence parameter is a ratio of a first product of the first impact parameter and the first confidence parameter to a second product of the second impact parameter and the second confidence parameter, wherein the second product is a best-case scenario of a clinical condition.

Conclusion

6. Any inquire concerning this communication or earlier communications from the examiner should be directed to Vivek Koppikar, whose telephone number is (571) 272-5109. The examiner can normally be reached from Monday to Friday between 8 AM and 4:30 PM.

If any attempt to reach the examiner by telephone is unsuccessful, the examiner's supervisor, Joseph Thomas, can be reached at (571) 272-6776. The fax telephone
